

Learning events for your CPD

January 2019 – September 2019

Wednesday 23 January 2019

Essential skills for practice: Embracing risk

Royal College of Occupational Therapists HQ, London, SE1

Occupational therapists must embrace and engage with risk to help people reach their chosen goals. This study day facilitated by Henny Pearmain, will help you understand the underlying professional and legal requirements and how to implement this within the workplace. Attendance will help you to see how risk can be managed to enable people to overcome the barriers that prevent them from doing the activities that matter to them.

Visit: rcot.co.uk/risk

Friday 8 March 2019

Essential skills for practice: Supervision

Royal College of Occupational Therapists HQ, London, SE1

Facilitated by Henny Pearmain, this course will help you make the most of your supervision – whether supervisee or supervisor. HCPC's Standards of Proficiency (HCPC 2013) state that occupational therapists should 'be able to reflect on and review practice' and that they should recognise the value of supervision in achieving this. Attendance on this study day will help you to optimise your use of supervision, to everyone's benefit.

Thursday 21 March 2019

Masterclass: Assessing and treating fatigue: Skills and strategies for Occupational Therapy Practice

Royal College of Occupational Therapists HQ, London, SE1

Facilitated by Sue Pemberton, this Masterclass is aimed at occupational therapists from any clinical setting who find that fatigue is a significant problem for their clients and who want to increase their knowledge, enhance their skills and develop this area of practice. Delegates will learn fatigue management strategies and gain an increased understanding of fatigue and how to assess its impact upon daily life.

Visit: rcot.co.uk/fatigue

Monday 25 - Friday 29 March 2019

Assessment of Motor and Process Skills (AMPS) course

Royal College of Occupational Therapists HQ, London, SE1

The Assessment of Motor and Process Skills (AMPS) is an innovative observational assessment that is used to measure the quality of an individual's activities of daily living.

Following the completion of AMPS training, delegates will be able to administer, score and interpret the AMPS, use the AMPS methodology to assess a person's functional ability and use the AMPS to plan and guide

occupational therapy intervention (direct and consultative).

Visit: rcot.co.uk/ampsmar19

Thursday 4 April 2019

Masterclass: Parkinson's Disease

Royal College of Occupational Therapists HQ, London, SE1

Facilitated by Ana Aragon, this Masterclass is designed to enable occupational therapists to enhance their existing skills and confidence in managing patients who present with any form of Parkinsonism in acute or community settings. This one day masterclass will provide participants with the knowledge and skills to deliver evidence-based, condition-specific interventions for people with Parkinson's' and related movement disorders and increase awareness of relevant policy and best practice guidelines.

Visit: rcot.co.uk/parkinsons

Monday 20 April 2019

MOHO ExpLOR Study Day: Using the MOHO Exploratory Level Outcome Ratings

Royal College of Occupational Therapists HQ, London, SE1

MOHO-ExpLOR is the latest assessment based on MOHO to be developed in the UK. It highlights the factors that support occupational participation when a person experiences severe impairments, and even when a person's health is deteriorating.

Facilitated by Sue Parkinson, the aims of the workshop are to:

- Distribute the MOHO-ExpLOR assessment
- Outline the exploratory level of change
- Examine the MOHO-ExpLOR items and rating scales
- Consider associated environmental interventions

Visit: rcot.co.uk/mohoexplor

Monday 16 - Friday 20 September 2019

Assessment of Motor and Process Skills (AMPS) course

Royal College of Occupational Therapists HQ, London, SE1

The Assessment of Motor and Process Skills (AMPS) is an innovative observational assessment that is used to measure the quality of an individual's activities of daily living. Following the completion of AMPS training, delegates will be able to administer, score and interpret the AMPS, use the AMPS methodology to assess a person's functional ability and use the AMPS to plan and guide occupational therapy intervention (direct and consultative).
